SUMMARY

I am a full-stack developer skilled in frontend, backend, and database technologies. I have built multiple projects using **React.js, Node.js, Express.js, and MongoDB** to solve real-world problems. I have worked with modern frameworks like **Tailwind CSS** to build **responsive UI designs**. I have solved many **DSA** problems in **Java** on **LeetCode**, improving my problem-solving and analytical skills.

EDUCATION

B. Tech in Computer Science | Seth Vishambhar Nath Institute of Engineering & Technology, Barabanki *Jul 2022 – Jul 2026*

XII (Up Board) | Mahatma Gandhi Inter College, Gorakhpur *Jun 2021 – Jun 2022*

SKILLS

Programming Languages: HTML5, CSS3, JavaScript, React.js, Node.js, Express.js, MongoDB, MySQL, Redis, DSA in Java
Frameworks/Libraries: Tailwind CSS, Bootstrap, Redux
Tools & Deployment: Git & GitHub, VS Code, IntelliJ IDEA, Postman, Vercel, Netlify, Render and AWS
Other Skills: SEO Optimization, Responsive Web Design, API Integration, Debugging & Testing

EXPERIENCE

Full-Stack Web Development Training | Sheryians Coding School (Remote) [Certificate](#) *Jan 2025 - Sep 2025*

- Finished a 6-month full-stack training program with an emphasis on database administration, frontend, backend, AI integration and deployment.

MERN Stack Internship | Zidio Development (Remote) [Certificate](#) *Jun 2025 – Sep 2025*

- Gained practical experience in developing and implementing full-stack web applications during a 3-month internship in MERN Stack development.

PROJECTS

Excel Analytics: 1. Created a **file upload and data parsing** Excel analytics application using the **MERN stack**. [Live Link](#)
2. Interactive charts were added to provide a **clear visual representation of the data**.
3. Incorporated **AI insights** to expedite analysis and highlight trends.

Prompt Vault: 1. Built a scalable full-stack web application using MERN Stack for managing user prompts. [Live Link](#)
2. Implemented **secure JWT-based authentication** for user access.
3. Added **Like and View Public Prompt** features to monitor activity, highlight trends, and enhance user experience.

E-Commerce: 1. Developed a scalable **e-commerce backend** using Node.js, Express, MongoDB, and **microservices**.
2. Microservices such as, **auth, product, cart and notification**, using **RabbitMQ** for communication
3. Implemented **role-based** access control for **user and admin** authentication. [GitHub Link](#)

CERTIFICATIONS

- Java Programming** from MSME-Technology Development Centre (PPDC) *Dec 2023 – Jan 2024*
- JavaScript Basics** from HackerRank *Mar 2025 – Apr 2025*
- Soft Skills and Career Guidance** from HCL Foundation *Apr 2025 – May 2025*
- Frontend (React) Hackathon** from Sheryians Coding School *Jul 2025 – Aug 2025*
