PROFESSIONAL SUMMARY

Full Stack Developer specializing in MERN stack (MongoDB, Express.js, React.js, Node.js) with hands-on experience building scalable, production-ready web applications. Proficient in RESTful API design, JWT authentication, microservices architecture, and data visualization. Experienced with cloud deployment (Vercel, Render), state management (Redux Toolkit), and AI integration. Strong foundation in Data Structures & Algorithms with a focus on clean, maintainable code.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Redux Toolkit, Chart.js, Three.js

Backend: Node.js, Express.js, REST API Development, Microservices Architecture

Databases: MongoDB, MySQL

Authentication & Security: JWT Authentication, Role-Based Access Control (RBAC), Protected Routes

Tools & Platforms: Git, GitHub, Postman, Vercel, Render, RabbitMQ, Jest (Testing), Nodemailer

Core Concepts: Data Structures & Algorithms, AI/LLM Integration, API Integration, Problem Solving, Debugging

PROJECTS

Excel Analytics AI Powered | [GitHub](#) | [Live Demo](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Redux Toolkit, Chart.js, Three.js, JWT

- Developed a full-stack analytics dashboard that allows users to upload, parse, and visualize Excel data, reducing manual data processing time by 40%.
- Implemented secure JWT-based authentication with role-based access control (admin/user), protected routes, and conditional UI rendering to enforce authorization.
- Built dynamic 2D and 3D data visualizations using Chart.js and Three.js, supporting bar, line, pie, and scatter chart types for comprehensive data exploration.
- Designed and optimized RESTful APIs with Node.js and Express.js to handle file uploads, server-side data processing, and analytics storage in MongoDB.
- Integrated AI-powered data summarization to automatically generate actionable insights from uploaded Excel datasets, improving data interpretation efficiency.

School ERP Management System | [GitHub](#) | [Live Demo](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, Redux Toolkit, REST APIs, Nodemailer

- Engineered a full-stack School ERP covering student management, attendance tracking, fee collection, and academic records for multi-role users (Admin, Teacher, Student, Parent).
- Implemented JWT-based RBAC with strict privilege separation across roles and built real-time dashboards for attendance analytics and academic performance metrics.
- Designed modular RESTful APIs for admissions, timetables, and exam results; integrated Nodemailer for automated fee reminders and result announcements.

AI Powered E-Commerce Backend (Microservices) | [GitHub](#)

Tech Stack: Node.js, Express.js, MongoDB, JWT, RabbitMQ, REST APIs, Jest, Nodemailer

- Architected a scalable e-commerce backend using Node.js, Express.js, and MongoDB following a microservices architecture for independent scalability and maintainability.
- Developed independent microservices for authentication, product management, cart, and notification services, using RabbitMQ for asynchronous inter-service communication.
- Implemented role-based access control (RBAC) for user and admin authentication; validated service reliability using automated test cases written in Jest.

EDUCATION

Bachelor of Technology in Computer Science & Design

Seth Vishambhar Nath Institute of Engineering & Technology 2026
